

FEATURES AT-A-GLANCE

CATSWeb® is the field-proven leader as the industry's Enterprise Quality System of choice – accessed by thousands of users worldwide 24/7. CATSWeb is not just a static data repository, it's a collaborative, real-time dynamic workflow tool that assists you in your problem solving efforts.

CATSWeb®

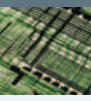

GENERAL	
User-defined forms	Unlimited
User-defined fields	Up to 1000 per form
Electronic signatures	Unlimited
Electronic signature types	Unlimited
Notes, file attachments, links and subforms	Unlimited
User-defined automatic escalation and notification rules	Unlimited
User-defined automatic task assignments	Yes
User-defined form-driven queries	Yes
User defined filtered task lists	Yes
Full text search (basic and advanced)	Yes
Flexible workflow	Yes
Reporting	Yes
Fully configurable point-and-click GUI: change colors, fonts, layout, etc.	Yes
Data export to Excel, Word, etc.	Yes
Fully queryable audit trail	Yes
Works with all Web browsers (Netscape, Internet Explorer, Safari, Opera, etc.)	Yes
Works on all operating systems	Yes
Zero software client (no JavaScript, VB Script, ActiveX, etc.)	Yes
Zero setup client	Yes
Unlimited customer/supplier access	Yes
Great performance over low-bandwidth connections (e.g., dial-up)	Yes
100% FDA 21 CFR Part 11 compliant	Yes
Integrated records management (for compliance with record retention policies)	Yes
FORM CUSTOMIZATION	
Configurable field names & captions	Yes
Configurable form layout	Yes
Configurable default values (fixed, looked up, or calculated)	Yes
Configurable field validations	Yes
Configurable field properties: Mandatory, Editable, Visible, Format, etc.	Yes
User-defined selection lists -- unlimited lists, with unlimited entries, bound to any form field(s)	Yes
Any field may be linked to any external data	Yes
Unlimited number of special-purpose buttons and links may be added to any form	Yes
Intelligent selection lists (list contents react to other data entered)	Yes
Functionality can be extended via Web Services	Yes
E-MAIL INTEGRATION	
Universal e-mail support	Yes (see list below)*
Automatic task notifications via e-mail	Yes
Record forwarding via e-mail	Yes
HTML-formatted e-mail messages	Yes
Daily task list e-mails	Yes

“WE SELECTED CATSWEB AS OUR GLOBAL QUALITY TRACKING SOLUTION BECAUSE IT WAS FAST IN RESPONSE TIME, 21 CFR PART 11 COMPLIANT, FIELD-PROVEN FOR GLOBAL APPLICATIONS, AND EASILY CONFIGURED. OTHER SYSTEMS JUST COULDN'T MEASURE UP.”

Rick Smith
Quality Manager
Alcon Labs

*Works with any mail system that is compliant with SMTP/POP3 (Internet mail), MAPI, Active Messaging/CDO (Microsoft Exchange), VIM (Lotus), MHS (Novell), Lotus Notes API, or Banyan VINES.

AssurX

“WE SELECTED CATSWEB
BECAUSE IT HAD THE
FLEXIBILITY TO MATCH OUR
PROCESSES VS. CHANGING
OUR PROCESS TO FIT THE
SOFTWARE AND THE OPEN
ARCHITECTURE TO
INTEGRATE WITH SAP.”

Russ Kawai
PSM/QSM Manager
Honeywell

SECURITY	
Supports SSL encryption	Yes
Dual authenticated password resets	Yes
Configurable minimum password length	Yes
Configurable minimum password numeric characters	Yes
Configurable password lifetime	Yes
Configurable maximum failed login attempts	Yes
Configurable session duration	Yes
Configurable inactivity timer	Yes
Configurable record access restrictions	Yes
Configurable field access restrictions	Yes
Configurable functional restrictions	Yes
Supports access restrictions based on user's TCP/IP address	Yes
Supports Windows (NT) Authentication	Yes
SCALABILITY	
Supports multiple/clustered Web servers	Yes
Supports multiple/clustered database servers	Yes
Supports load balancing	Yes
Supports distributed implementations (DCOM/COM+)	Yes
EXTENSIBILITY	
Integrates with <i>all</i> external information systems and databases	Yes
Can display data from <i>any</i> external information system, database, or file	Yes
Can update data in <i>any</i> external information system, database, or file	Yes
One-click drill down access to internal or external data	Yes
Automatic completion of user entries using internal or external data	Yes
Selection lists/default values may come from external systems	Yes
Supports custom validation routines	Yes
All CATSWeb records and user functions may be referenced by URL	Yes
Programmable event model	Yes
API based on Web Services standards (see below)	Yes
API based on ActiveX/COM standards	Yes
WEB SERVICES	
Can consume and use <i>any</i> external Web Service to extend system functionality	Yes
Web Services API spans all system functionality	Yes
Optimized interfaces for both J2EE and Microsoft .NET	Yes
Fully functional without an integration server	Yes
XML/SOAP messaging, document/literal style	Yes
Designed to comply with WS-I Basic Profile 1.0	Yes
Supports multiple, independently configurable Web Services	Yes
Application's security features/restrictions fully integrated/enforced	Yes
Web Service schemas automatically adapt to form and workflow designs	Yes
Web Services integrated throughout application, including the user interface	Yes
Supports off-line data entry	Yes
Supports synchronous, asynchronous and one-way messaging	Yes
Supports custom pre and post service call processing	Yes
