

FORMS PLUS

for CATSWeb

INTRODUCTION

Forms Plus allows you to configure CATSWeb forms and fields by adding the following enhancements to CATSWeb:

- **RESIZE TEXT BOX**
Increase or decrease the size of a text entry box. Increasing can allow users to see all of the text entered during Add or Edit mode. Decreasing can reduce the space consumed on the form and can also optionally limit the amount of data users can enter, allowing creation of a "virtual" field of any size. For example, a 30 character text field could be limited to 5 characters of entry, thereby creating a "virtual" 5 character text field.
- **ENHANCED LISTS**
Allow users to select from a list of meaningful descriptions vs. shorter codes that are actually being stored with the record (product code and description, etc.)
- **ADD FORMS BUTTONS**
Display CATSWeb List Items as a series of radio buttons (single-select) or checkboxes (multi-select). May also be configured to show an Enhanced List of choices in the radio buttons or checkboxes, if desired
- **ADD POPUP CALENDAR**
Display a JavaScript date picker on individual or all date fields on CATSWeb forms
- **MAINTAIN SCROLL POSITION**
Redisplays the form in same position after the user clicks or triggers Reload vs. returning the form to the top position
- **ADD "IN PROGRESS" POPUP**
Display a custom "please wait" message to the user when Submit or Reload triggers several Event Hooks that cause a delay

SUPPORTED CATSWEB VERSION

16F (min) required with Form Load Event Hooks installed.

CATSWeb 16K+ allows configuration via a set of new fields added to the Edit Field Definition form. Configuration on earlier supported versions is done by entering codes in the Field Description (such as [*POP*] for a popup calendar).

Application and installation manual delivered electronically and can be self-installed.

CATSWEB USER REQUIREMENTS

Web browser must be able to process and execute JavaScript for the following features:

- Add Popup Calendar
- Maintain Scroll Position
- Add In Progress Popup

"...WE FELT THAT CATSWEB'S
EASE OF CONFIGURABILITY
ALLOWED US TO CONTINUE TO
ADAPT OUR PROCESSES AND
SOLUTIONS TO GENZYME'S
INCREASING PRODUCT
PORTFOLIO, FACILITIES AND
INTERNATIONAL MARKETS."
