

ASSURX ONDEMAND

MANAGE YOUR BUSINESS. NOT YOUR SOFTWARE.™

AssurX OnDemand (software as a service) delivers all the functionality and features of AssurX's comprehensive quality and compliance management solutions quickly, securely and reliably over the Internet. There is no waiting for IT staff, no hardware to buy, and no software to install, maintain or backup. Delivered through our private cloud, your system is up and running within days, not weeks or months.

OnDemand Solutions Let You Get Down to Business

The OnDemand dedicated hosting service provides the development, maintenance and ongoing upgrade of the software so companies can stay focused on their core competencies. It delivers rapid set up and configuration—systems can be ready for use within days of signing up, not weeks or months—and provides instant, secure access to your quality and compliance management systems 24/7/365 from anywhere with an Internet connection.

Low pay-as-you-go fees mean no large up front costs. And, AssurX OnDemand gives the option to bring the entire system in-house at any time.

WITH ASSURX ONDEMAND COMPANIES CAN:

- **Get Very Rapid Deployment**—The applications can be fully configured and available to your users within days of signing up for the service. No complex, time-consuming, and expensive server and client installations are required
- **Be Free of System Administration**—Traditional purchased software applications must be managed and administered by qualified information systems personnel. AssurX performs these functions, freeing your staff to focus on the company's core competencies
- **Gain Ubiquitous Access**—Extend the workplace beyond the plant and office. Work anytime, anywhere on any device with an Internet connection
- **Lower Costs**—AssurX OnDemand solutions are available for a low, annual pay-as-you-go fee, making the large up-front cost of traditional purchased software a thing of the past

Key Features and Functionality

MINIMAL CLIENT HARDWARE & ACCESS FROM ANY DEVICE WITH AN INTERNET CONNECTION

AssurX applications can be accessed from any computer, tablet or smart phone, on any operating system, on any Web browser with an Internet connection.

IMPORT YOUR OWN DATA

Import just about any type of text delimited files such as: lists; problem codes; vendor lists; customer lists; product lists; or any type of data from spreadsheets, Lotus Notes, Microsoft Access, SQL Server or Oracle applications right into your AssurX OnDemand application.

REAL-TIME, FREE UPGRADES

Upgrades and new features are automatically available to users as soon as they are released. No installation is required. AssurX upgrades new features several times a year—many based on customer feedback and requests.

INTEGRATE WITH ANY OTHER SYSTEM/PROCESS

Integrate the OnDemand system with other processes or external systems to provide a seamless user experience. Improve efficiencies by connecting to parts, supplier or customer lists. Provide drill-down capabilities to internal records and data.

ALL THE GREAT FEATURES AND FUNCTIONALITY OF TRADITIONAL ASSURX SOLUTIONS

OnDemand delivers the same powerful functionality found in all AssurX on premise software solutions with features that are focused not only on performance, but designed with user friendliness in mind.

- **Built-in, user-configurable dashboards, reports and metrics.** No additional third party tools needed
- **Effective detailed analysis, trending and management tools**

“MANUFACTURING IS CHALLENGING ENOUGH WITHOUT THE WORRIES OF COMPUTER, NETWORK OR SOFTWARE PROBLEMS. PARTNERING WITH ASSURX ELIMINATES ALL OF THESE TECHNICAL BURDENS.”

FLEXIBLE
SOFTWARE DELIVERY

- ⊙ **Includes out-of-the-box, ready to use forms & best practice workflows** you can easily modify. Or, build your own using simple configuration tools that require NO programming
- ⊙ **Point-and-click configuring** for form design, workflows, approvals, escalation rules, and more. Eliminates the need for revalidation as the system is enhanced
- ⊙ **Fully configurable point-and-click graphical user interface (GUI).** Display what you want where you want it. Even use your own styles and corporate colors
- ⊙ **Advanced full text search & query tools** with the unique ability to query all fields as named and configured across all forms

SECURITY WITHOUT COMPROMISE 24/7/365

We understand how critical and sensitive quality, risk and compliance data may be. Our OnDemand applications are delivered through managed firewalls in a Safe Harbor and SSAE 16 certified data center via Secure Sockets Layer (SSL), the standard security protocol used for e-commerce on the Internet. AssurX engineers constantly monitor the firewalls and keep current on industry best practices, updating security policies as necessary to fend off attacks from hackers and other unauthorized users.

AssurX provides a dedicated private database for each customer to house their specific data and configurations. Your data and configured systems are completely secure, confidential, and available only to you and authorized AssurX technical support personnel (on an as-needed basis to provide support services).

“We didn’t want to deal with installing software.
 With AssurX OnDemand, we got up and running very quickly.
 It’s a huge benefit to our business to have AssurX.
 Before we were incident-driven, but now we can be more trend-driven
 and proactive to better anticipate potential problems and
 fix them before they get big.”

Vice President of Operations,
 Hampton Forge, Ltd.

YES, YOU CAN TAKE IT WITH YOU

Start with the OnDemand delivery model, and later take the system in-house (OnPremise) at any time. AssurX Support will help make the transition smooth and efficient.

TRAINING

AssurX offers multiple training formats including on-line learning, personal consulting, and on-site training courses.

VALIDATION

Validation services are offered for OnDemand solutions which include process qualification templates for each pre-built application. Each qualification template is cross-referenced to the process requirements and provided in electronic format.

About AssurX

AssurX, Inc. provides companies automated enterprise quality management and regulatory compliance software solutions. With decades of expertise built into their solutions, AssurX helps companies exceed quality expectations, ensure compliance, manage risks and better govern their enterprise.

AssurX’s powerfully flexible software unites and coordinates information, activities and documentation in one reliable system, effectively managing any quality- or compliance-related operations. The easiest on the market to deploy, configure, use and adapt, AssurX is ideal for every business—of any size—even the most highly regulated.
