

DATASHEET

# AssurX Analytics

AssurX Analytics is a business intelligence (BI) analytical tool fully integrated within the AssurX platform, and can create individual charts, metrics and reports along with complete dashboards. Unlike other BI tools, the AssurX BI tool utilizes real-time live data, so you are always analyzing the current data, rather than time-late warehoused information. AssurX Analytics employs simple drag and drop, point and click functions, which makes it easy for users to create personalized reports.

## AssurX Analytics Benefits:

- Provide more control over data analysis
- Ease in generating reports that include charts and graphs
- Streamline output construction
- Support key performance indicators (KPIs) using real-time data

## Key Features:

- Wide variety of visual choices for data display and enhanced drill downs for reporting
- Enhanced dashboard building feature for advanced reports with flexible image displays including jpeg, png, gif along with charts and graphs. Intuitive process
- Includes pre-built examples of reports and dashboards
- Easy to use formulas similar to Excel formats
- Standard export data options available (Excel, PDF, RTF, CSV)
