AssurX AutoValidator™

Automate and execute validation tasks to ensure your software systems are in a constant state of control.
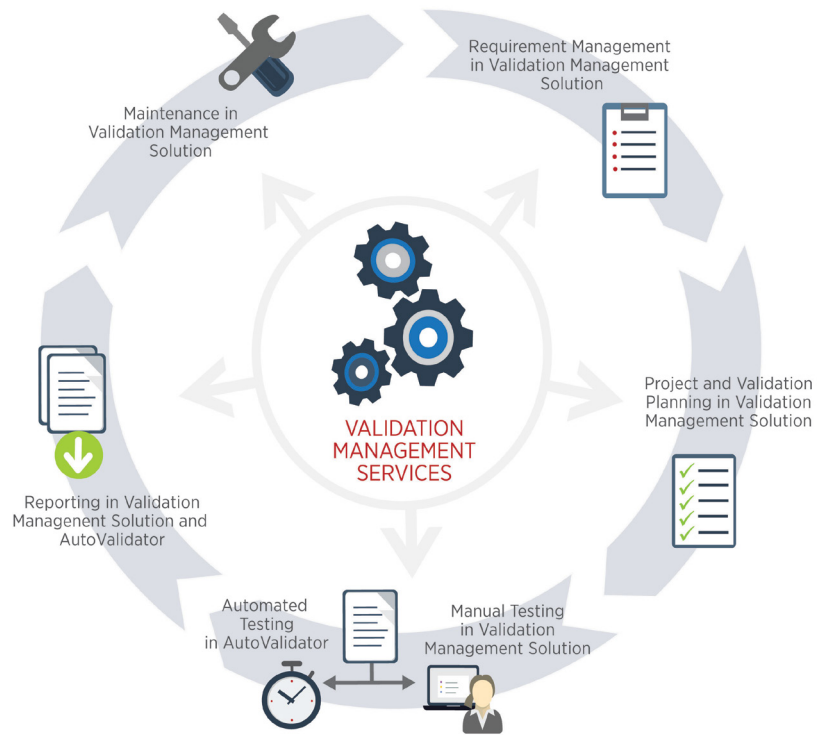

AssurX

The AssurX AutoValidator™ empowers customers to plan, prioritize, design and track validation tasks by priority in one centralized solution.

AutoValidator integrates with the AssurX Validation Management Solution (VMS) to simplify the test management process by bundling test management and test execution which leads to the deployment of high-quality applications quickly and effectively.

Working in conjunction with VMS, AutoValidator provides the ability create a paperless quality process which allows for repeatable requirement gathering, validation planning, scheduling tests, analyzing results and managing configuration issues.

AUTOVALIDATOR BENEFITS

+ **Accelerate Results:** Delivers results in less time and will assist developers in quick feedback of configuration issues.

+ **Repeatability:** Reusable tests that can be utilized through different approaches and on different browser types.

+ **Faster Issue Management:** Automated creation of issue records to enable rapid identification and resolution of configuration issues.

+ **Faster Time-to-Validation:** Once automated, the test library execution runs faster than manual testing.

+ **Return on Investment:** Initial investment is quickly returned by the reduction in manual hours required to run tests.

+ **Testing Efficiency Improvement:** After the setup and configuration is completed, future tests will take significantly less time to execute. Execution is virtually unattended, leaving the results to be monitored towards the end of the process.

+ **Audit Preparedness:** Provides auditors and inspectors with on-demand, objective evidence.

+ **Peace of Mind:** Quality leaders can focus on core responsibilities of delivering safe, innovative products to market.
