

CATSWEB® ELECTRIC RELIABILITY NERC STANDARDS UPDATE SERVICE

STAYING CURRENT THE EASY WAY

AssurX's NERC Standards Update Service keeps customers current with new and revised NERC reliability standards, and delivers the fastest way to update any CATSWeb ER system. AssurX does the legwork by monitoring the NERC website for new or revised standards monthly and parsing standards information, including PDFs and RSAWs (Reliability Standard Audit Worksheets), into CATSWeb-ready form so CATSWeb ER can be brought up to date in minutes. Subscribers receive email notices with a download link to the new materials as they become available.

A Streamlined Process to Stay On Top of Standards

As NERC continually posts new and revised reliability standards to their website (www.nerc.com), AssurX captures the information into a specially formatted Microsoft® Excel® import file for use with an update utility. For each new or updated standard, the import file spreadsheet contains the NERC Standard, Requirements, Measures, and Level records information and aligns it with the form structure in the CATSWeb ER database. The import process also includes each standard in PDF form (as released by NERC) and if applicable, the NERC RSAW files.

Update Service subscribers receive an email notice on an approximately monthly basis as new NERC standards and RSAWs are available to update CATSWeb ER. The prepared files are accessed through a link to the AssurX Customer Download Site.

Using AssurX's NERC Standard Utility application, the new or revised standards and any NERC attachments are automatically imported into CATSWeb ER. The update process is easily customizable to work with any unique configurations made to CATSWeb ER. The Utility's User Guide details quick steps to accommodate custom configurations with simple changes to the Standards Import spreadsheet. The update utility does the rest.

UPDATE SERVICE ADVANTAGES

- Reduces the burden of tracking and identifying newly posted NERC standards and RSAW documents on the NERC.com website.
- Makes updating CATSWeb ER with the NERC Standard Utility fast and easy. Update in just minutes.
- Delivers ALL the elements needed to easily update CATSWeb ER including: Standard/ Requirement/Measure/Level records, RSAWs, and standard PDFs.*

MINIMUM REQUIREMENTS

- CATSWeb ER V3 or Higher (OnDemand or OnPremise)
- Service Pack 16P Minimum
- NERC Standard Utility V2

EXCLUSIONS

Updates do not include:

- Regional standards (e.g. SERC, WECC, NPCC)
- Regional RSAW
- FERC standards

SUPPORT

- Non-standard support provided through AssurX Professional Services

* Disclaimer: AssurX is not responsible for errors or omissions in the provided Excel import file, NERC standard files, and NERC RSAW files derived from the nerc.com website.
