BROCHURE
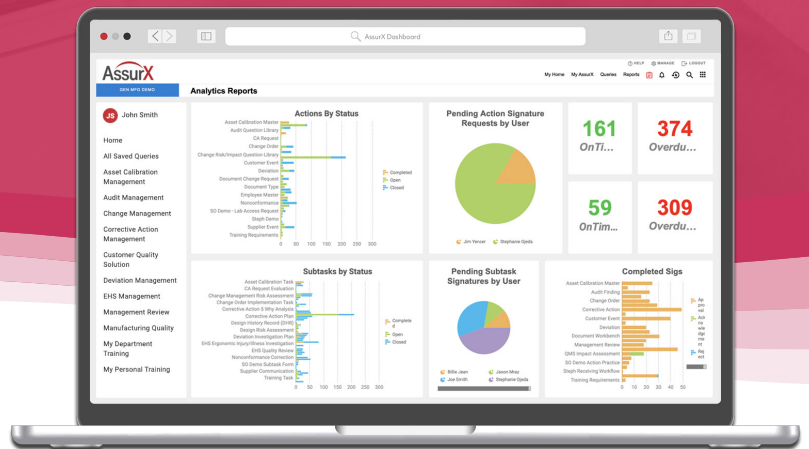

Enterprise Quality Management Software

Automate. Adapt. Improve.

AssurX EQMS automates and harmonizes information, activities and documentation in one reliable, secure platform. Manage any quality or compliance-related issue within a closed loop system.

Available on the AssurX cloud or on-premise, AssurX is ideal for any manufacturing company regardless of size or complexity.

AssurX is uniquely designed with a high level of configurability and an unmatched ease of deployment. Create an integrated, precision quality management system that rapidly adapts to change and scales seamlessly.

Dynamic And Configurable

The AssurX platform easily adapts over time to meet your evolving business needs with powerful functionality focused on configurability, performance and flexibility. The platform allows users to integrate quality processes into a scalable, rules-driven electronic ecosystem and comes with preconfigured workflows.

AssurX intergrates with most reporting tools and enterprise business systems including ERP, PLM, LIMS, CRM, CMMS and internally developed applications and databases.

Benefits include:

- Collaboration across the value chain on quality issue management, compliance requirements, reporting, training and audits.

- Full visibility and control into trends and data to help make informed decisions to continually improve quality operations.

- Minimize risk through risk-based compliance with global regulations and ISO standards.

- Robust, flexible interaction with an open integration interface to facilitate quality production.

One Platform. Every Solution.

- » Audit Management
